

Got Moss?

control *it with*
one application

Visit our website: www.flapest.com

- Moss is an air plant that does not feed on the tree but causes damage by its weight, by shading out sunlight, harboring insects and disease organisms.
- A single application kills the moss and moss seed. Guaranteed up to 95% control of existing moss. Does not damage grass, trees or other plants.
- The weight of the moss is reduced almost immediately.
- ***Moss is dead within 8 to 12 weeks.***

- Moss disintegrates and disappears gradually over the next 12 to 18 months.

Leaves no mess.

- It only takes one application to do the job.
- Our professional application costs far less than hand pulling moss. It has the advantage of killing the seed which cannot be removed by hand pulling.
- Our estimates are free and are based on the amount of liquid required.

No obligation whatsoever!
